

**I am more than inspired and motivated to be nominated in this position of ISPA's Regional Representative for Europe and must underline the successful cooperation, membership and partnership at The International Society of Precision Agriculture, ISPA and hope my personal vision could be widely introduced between the Board of Directors with my CV. My personal vision and main aim of this nomination related to my professional background and practical knowledge to make ISPAs Programs and Projects more visible, feasible and assist governments to develop policies, programs and projects to achieve the food security and to reduce hunger and malnutrition, to help develop the agricultural sectors, and to use their environmental and natural resources in a sustainable manner within Central, Eastern, South European Countries,**

**I would like to assist ISPA in the functional and technical guidance of Precision Agriculture, in close collaboration with the Regional Representatives, Board of Directors and Management of ISPA and other stakeholders as well as with the Kansas University and other professionals and young scientists.**

**I am more focused on the Inclusive Precision Agriculture, Statistics, Rural Development and Sustainable Agriculture by reaching the short term and long-term goals of ISPA to foster increased competitiveness within the agricultural sector, enhance food production, and successful realization of these objectives. Catalyze significant positive changes of the Precision Agriculture integrated with Digital and Smart Technologies for restoration of Soils, landscape, and Farm Management with far-reaching implications for rural development and economic growth. By complementing the ISPAs policy and Strategy approaches, I think I will be very useful for emphasizing the inclusivity as a core principle, ensuring that all stakeholders are actively involved in our projects implementation.**

**The main role of me I think will be to coordinate and manage the project implementation and the technical components of the projects that include the Precision Agriculture and rural development and integrated community development programs, with specific focus on supporting rural communities, extension services, ArcGIS, ArcGISGEO and other programs for geospatial analysis, dedicating on producers' groups, and Ag Cooperatives. Based on my experience and background I am able effectively coordinate and ensure the cohesion and synergies between different components (outputs) of the Precision Agriculture and ready to contribute the consultative and other meetings and organize an International Events, workshops and other events related to Precision Agriculture providing the**

**situation analysis (baseline assessment), which will be used to define baselines for project monitoring indicators. I am sure, being elected I could support the development of necessary mythologies and subsequent execution to facilitate the drafting and clearance of technical specifications and other relevant documentation required for the Precision Agriculture and Sectoral Benefits (Qualitative and Quantitatively). Because of my personal and professional networks within the EU I am able to establish and develop a monitoring system, tracking the project performance in terms of deliverables and indicators for all ISPA Projects and incentives.**
