ISPA Newsletter 14(2): Upcoming Conference Deadlines, CR Reports, Jobs, Events and More

Feb 26, 2026

May and June 17th ICPA and 11th ConBAP Deadlines

Presenter Registration Deadline 22 May 2026

All accepted Oral and Poster abstract presenters must register by **22 May 2026**. The abstract will be dropped from the conference program if the presenter is not registered by this date.

The 17th ICPA and 11th ConBAP offers two registration options. Attendees may register and pay in USD or BRL.

Questions pertaining to registration should be addressed to conference@ispag.org.

Register Today!

Paper Submission Deadline 15 June 2026

The online proceedings of the International Conference on Precision Agriculture and Brazilian Congress on Precision and Digital Agriculture will provide an enduring, accessible, and citable record of your research.

Oral presenters are STRONGLY ENCOURAGED to prepare a full-length paper (4-15 pages long) for online non-referred conference proceedings.

Poster presenters are STRONGLY ENCOURAGED to also prepare a two page summary or full-length paper.

Questions pertaining to paper submission should be addressed to conference@ispag.org.

Author Instructions

ISPA Award Nomination Forms Now Open!

The International Society of Precision Agriculture has the privilege of recognizing individuals whose work elevates Precision and Digital Agriculture and strengthens our community. We are now accepting nominations for the ISPA awards honoring exceptional achievement, innovation, leadership, and service.

Nominations are open for

- The Outstanding Graduate Student Awards
- The Pierre C. Robert Precision Agriculture Awards
- **NEW!** ISPA Legacy Award
- **NEW!** ISPA Teaching Excellence Award

Nomination submissions are due on **10 April 2026.**

Award Information and Nomination Forms

From Research to Practice: What Does the Australian PA Society Do?

I am pleased to have been appointed as one of Australia's Country Representatives to the International Society of Precision Agriculture (ISPA), alongside Professor David Lamb, Chief Scientist of the Food Agility CRC, who has served on ISPA for several years. I am Senior Lecturer in Precision Crop Management at the University of Sydney, where I lead PA research projects and also teach undergraduate and postgraduate agronomy and PA courses.

I just wanted to take this opportunity to provide a bit of context on the PA landscape in Australia, and highlight some of the differences and opportunities for collaboration with ISPA and other national societies. Australia's national PA society is the Society of Precision Agriculture Australia (SPAA). It is an organisation I am proud to be involved with through a range of advisory and extension activities.

ISPA Country Representative - Boris Leon Cruz

Country Representatives serve to help promote ISPA by championing the ISPA mission and purpose globally, in particular, in the country they represent. ISPA is growing internationally so Country Representatives remain an important position to help ISPA best serve people, groups, governments and others, globally connecting them to science and experts.

Please join us in thanking ISPA Country Representative from Honduras, Boris Leon Cruz.

If you are interested in becoming a Country Representative, please email info@ispag.org with your bio highlighting your experience in precision agriculture and your CV. ISPA requires that all Country Representatives are current members of the society. To become a member, please complete the membership form.

Precision Agriculture in Sugarcane: Why is Variable-Rate Technology still not being Adopted at Scale?

For more than two decades, the sugarcane sector of Valle del Cauca, Colombia, has served as a living laboratory for precision agriculture. This is not a story about theoretical pilots or futuristic promises. It is a story about maps, models, machines, data and measurable results. Yet, as of 2024, less than 10% of the sugarcane area applies variable-rate fertilization, despite consistent evidence of yield gains, input optimization, and reduced environmental footprint.
