International Society of Precision Agriculture

MONTHLY NEWSLETTER

Help Shape the Future of AgriTech in Europe

The AGRITECH project held its kick-off meeting in Thessaloniki, Greece. Marcel Ionescu, ISPA Country Representative for Romania, and Gabor Milics, ISPA Country Representative for Hungary, participated in the meeting and engaged in collaborative discussions. Both represent partner institutions within the project consortium.

As an associated partner of the AGRITECH project - "Alliance for Innovative Learning Environment in Advanced Agriculture through Technology and Management" (ERASMUS-EDU-2024-PI-ALL-INNO), ISPA is supporting the development of the new "AgriTech Manager" role - a key professional leading the digital and green transition in agriculture.

We invite agri-businesses, researchers, educators, technology providers, and policymakers to contribute their insights by completing a short questionnaire. Your input will directly inform future training programs and the formal recognition of this role in EU frameworks such as ESCO., the European Skills, Competences, Qualifications and Occupations classification, official tool of the European Commission.

Please complete the survey by **6 June 2025**. The survey is available in the following languages:

[English](#) [Greek](#) [Hungarian](#) [Romanian](#) [Czech](#) [Italian](#)

ISPA Country Representative - Brent Sams

Brent Sams

ISPA United States Representative

Brent Sams is a research scientist in the Viticulture Research department at E&J Gallo Winery. His interests include Precision Agriculture, Variable Rate Management, Remote Sensing, Horticulture, and Biogeography. Current work involves assessing spatial variability of fruit quality at different spatial scales, variable rate management, and yield/fruit quality sensing/prediction.

Brent Sams, PhD

#ISPAg

Country Representatives serve to help promote ISPA by championing the ISPA mission and purpose globally, in particular, in the country they represent. ISPA is growing internationally so Country Representatives remain an important position to help ISPA best serve people, groups, governments and others, globally connecting them to science and experts.

Please join us in thanking ISPA Country Representative from the United States, Brent Sams.

If you are interested in becoming a Country Representative, please email info@ispag.org with your bio highlighting your experience in precision agriculture and your CV. ISPA requires that all Country Representatives are current members of the society. To become a member, please complete the

[membership form.](#)

Precision Agriculture Definition

Precision Agriculture is a management strategy that gathers, processes and analyzes temporal, spatial and individual plant and animal data and combines it with other information to support management decisions according to estimated variability for improved resource use efficiency, productivity, quality, profitability and sustainability of agricultural production.

The International Society of Precision Agriculture (ISPA) is a non-profit professional scientific organization.
The mission of ISPA is to advance the science of precision agriculture globally.
