

On-Farm Experimentation Community Info No. 2

Dec 22, 2020

On-Farm Experimentation Community ([OFE-C](#)) of the International Society of Precision Agriculture ([ISPA](#))

Multi-criteria decision analysis in agriculture rarely consider important elements

The [study](#) of a corpus of 954 articles published by INRA scientists from 2007 to 2017 concludes that MCDA studies will need to include participatory science to involve stakeholders (i.e., public authorities, governmental agencies) and end users (i.e., farmers, producers, industry, consumers) in the construction of the multi-criterion evaluation but also in the resulting decisions.

The Research Data Alliance and Agriculture

With over 10,000 members from 145 countries, the Research Data Alliance (RDA) provides a neutral space to develop and adopt infrastructure that promotes data-sharing and data-driven research to enable the open sharing and re-use of data. RDA has a grass roots, inclusive approach covering all data lifecycle stages, engaging data producers, users and stewards, addressing data exchange, processing, and storage. Generic topics of its interest are social hurdles on data sharing, education and training challenges, data management plans and certification of data repositories, disciplinary and interdisciplinary interoperability, as well as technological aspects.

The RDA is constituted of different elements, including Working Groups (WG) and Interest Groups (IG), some of which of particular interest in agriculture:

- [Agrisemantics](#) WG
- [Agricultural Data](#) IG
- [Capacity Development for Agriculture Data](#) WG
- [Geospatial](#) IG
- [Engaging Researchers with Data](#) IG
- [Data Type Registries](#) WG
- [FAIR Data Maturity Model](#) WG
- [Metadata Standards Catalog](#) WG
- [Rice Data Interoperability](#) WG
- [Research Data Repository Interoperability](#) WG
- [Wheat Data Interoperability](#) WG

iSDAsoil: African soil properties at 30m resolution

Smallholder farmers need to find a way past the status quo and a path to modernizing their operations. The mapping system—[iSDAsoil](#)— provides African soil properties at 30m resolution, and advisory services possible at the level of the single small farm. [iSDA](#)'s ultimate goal is to help smallholders develop long-term sustainable businesses. It was founded by three research institutes—Rothamsted Research, the World Agroforestry Centre (ICRAF) and the International Institute of Tropical Agriculture (IITA).

The International Data Week 2021

The International Data Week ([IDW 2021](#)) is scheduled for 8–11 November 2021 in Seoul, South Korea, in a hybrid form, under the theme “Data to Improve our World.” Open Science and the FAIR Principles are important enablers of discovery and innovation, particularly the use of Big Data and Artificial Intelligence. The IDW 2021 is supported by the International Science Council's Committee on Data (CODATA) and World Data System (WDS), and the Research Data Alliance (RDA).

Why are you getting this email?

This message has been sent to you because you are a member of, or have shown interest in OFE. If you know a colleague who would like to be kept in the loop, please transfer this [link](#) to fill the OFE-C Expression of Interest Signup. You will find the past Info editions at the same place. If you want to access to the full opportunities of the OFE-C and the ISPA please [join](#).

Should you have something to share with the Community or the Community leaders, let us know [here](#).
